## HAREX

### Urinary Incontinence Reality

## MERA Medical Solutions Company

We design, manufacture and sell medical devices aimed at improving the life of the patients. We focus on specific pathologies.

Male urinary incontinence:

- Suffered in silence. Patients do not talk about it openly.
- Poor range of solutions, not as developed as those for female urinary incontinence.
- Emotional distress , psychological issues, huge self stem issues.
- Millions of men affected.

It is common with prostate cancer treatments. Also men can become incontinent from neurologic injury, congenital defects, strokes, multiple sclerosis, and physical problems associated with aging.

Key data (Source: [European Association of Urology & oni.es](http://European Association of Urology & oni.es)):

- 7% of male world population suffers from urinary incontinence
- Urinary incontinence patients age → > 40 years' old – 10%
- Life expectancy → Developed countries > 75 years

### MERA Medical Solutions Company

**What is Harex®?** Harex is a premium medical device aimed at improving the management of life with male urinary incontinence.

**How does Harex® work?** Harex is placed just *below* the head of the penis and by applying gentle pressure on the urethra, stops the flow of urine, preventing and controlling involuntary leakage of urine.

Use HAREX to return to an  
active and healthy life
